

Surgery Policy

1. I will not perform any non-emergency anesthetic, surgical, or dental procedures until I am familiar with your practice and surgical team.
2. I will perform agreed upon anesthetic, surgical, and dental procedures when we are both comfortable with the arrangement.
3. I will perform agreed upon soft tissue surgery in an emergency situation, as needed, on a case by case basis.
4. Standard preanesthetic blood work, IV catheterization, intraoperative IV fluids and patient monitoring are required for me to perform surgery.
5. Anesthetic protocols will be discussed in advance and agreed upon in accordance with current best practices. I reserve the right to select the protocol that I believe is the safest for each patient on a case by case basis.
6. I will utilize current multimodal pain management protocols.
7. I do NOT perform orthopedic surgery, declawing, ear cropping or tail docking.
